

WEB SERVICE FOR E-COMMERCE AND COURIER PLATFORM INTEGRATION

INTRODUCTION

GETSyncro is a WEB service that allows you to quickly and easily connect to major e-commerce platforms and couriers on the market.

The software is able on the one hand to capture e-commerce orders and on the other hand to send information to couriers, for the printing of shipping waybills.

GETSyncro, in addition, is able to communicate with third-party systems, such as: ERP, CMS, MES, WMS, TMS

GETSyncro is based on an HA (High Availability with Failover Cluster) hardware infrastructure to ensure Business Continuity in any operational reality. It enjoys high scalability, thanks to the Cloud Computing structure on which it is based, allowing it to offer an S.L.A of no less than 99.8 %. No Plug-In required, no third-party software required. Direct communication via APIRest.
